

POWER DOWN UNDER

Pty Ltd

WWW.POWERDOWNUNDER.COM.AU

A white utility vehicle, possibly a Toyota Hilux, is parked in front of a dramatic sunset sky with orange and red clouds. The vehicle has a yellow stripe along the side and a large green logo on the door. The text 'POWER DOWN UNDER' is printed in large, bold, black letters on the side of the vehicle. Below it, in smaller green text, is 'Electrical & Communication'. There is also a small red and white logo on the side. The background shows a sunset over a landscape with some industrial structures in the distance. The sky is filled with vibrant orange and red clouds, and there are some white circular patterns in the top right corner of the image.

COMPANY OVERVIEW

Power Down Under Pty Ltd is a leading electrical solutions provider with a proven track record in delivering high-quality services for various industrial projects. With a team of experienced engineers, technicians, and project managers, we specialise in electrical system design, installation, commissioning, and maintenance. Our commitment to safety, reliability, and innovation sets us apart, making us the ideal choice for the commissioning and installation of electrical systems.

At Power Down Under, we are dedicated to providing top-notch electrical solutions for industrial projects. We are confident in our ability to deliver exceptional results for the processing plant green field commissioning and installation project. Thank you for considering us for this opportunity. We look forward to the possibility of working together to make this project a success.

Who are we ?

Power Down Under's founding directors have strong electrical contracting backgrounds along with extensive knowledge of civil contracting works. They have worked on many successful projects around WA.

Sam Green Managing Director

Sam is a qualified electrician with over 10 years extensive experience in design and constructing large scale projects in the mining and construction industries.

With strong working relationships with tier 1 mining companies, Sam has a particular focus on ensuring client's needs are met and exceeded.

Under Sam's leadership, he has fostered a productive and positive work environment to enable the team to achieve the organisation's goals.

Steve Green Director

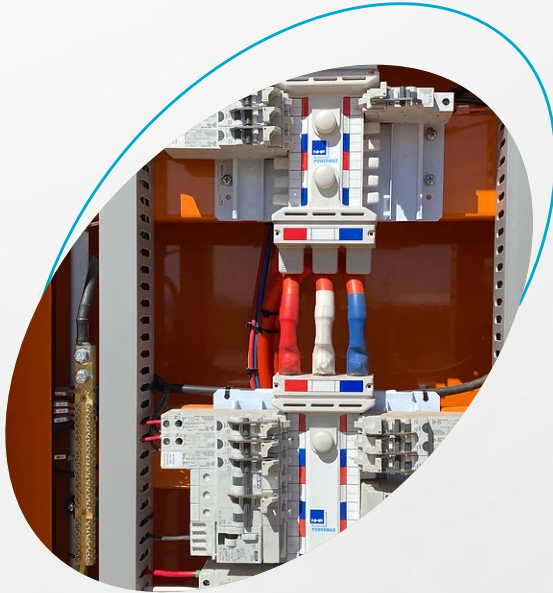

Steve is a qualified electrician with an extensive background of over 20 years in civil works and machine operating including directional drilling and installing a vast range of utilities. He has a high level of experience operating in the construction industry in the mining and utilise sectors.

Steve is passionate about ensuring the team delivers exceptional work, on time and in a safe manner.

Both Sam and Steve are experienced high pressure gas supervisors and provide support to ensure client's work is safe and compliant with regulators.

Our Services

Power Down Under Pty Ltd goes beyond just electrical solutions. We offer a comprehensive suite of services to support your industrial projects from the ground up. Our expertise spans across:

Electrical

Communications

Civil

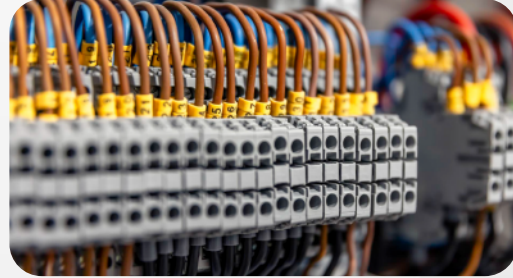

Service Locating

Core Competencies

Electrical System Design

Our team of experts excel in designing custom electrical systems tailored to the specific needs of processing plants. We focus on energy efficiency, reliability, and compliance with industry standards.

Installation & Wiring

We have a skilled workforce capable of efficiently installing and wiring electrical components, ensuring seamless integration within processing plant's infrastructure. Our technicians adhere to the highest quality standards and safety protocols.

Commissioning Services

We offer comprehensive commissioning services, including testing, validation, and optimisation of electrical systems. We ensure that all components function as intended and meet the required performance standards.

Safety Compliance

Safety is our top priority. We strictly adhere to all relevant safety regulations and industry standards. Our team is trained in best practices for electrical safety, ensuring a secure working environment throughout the project.

Project Management

Our experienced project managers oversee every aspect of the project, from planning to completion. They ensure seamless coordination among different teams, timely deliveries, and efficient problem-solving, guaranteeing the project's

Maintenance Support

We provide ongoing maintenance and support services to ensure the longevity and optimal performance of the installed electrical systems. Our responsive maintenance team is available 24/7 for any emergency support requirements.

PREVIOUS PROJECTS

Rothsay Gold Project – 100 Camp and NPI Area Installation

PCB – RAAF Pearce ISS – Substation HV cable upgrade

MARC – Aquatic centre Pumping / Air / Solar / Electrical

FMG – Pilot Plant and XRF laboratory

Roy Hill – ROM 4 / Crusher 5 & NPI

Southern Gateway Alliance – Bunbury outer ring Rd – Transportable construction and Installation

FMG – Pilot Plant – Portable sample facility

Wheatstone Fly Camp – Electrical and Communications for Transportable Building Construction

Pilbara Minerals – NPI Administration relocation

Marandoo Camp – Central facilities Installation

Deflector Gold Project – Camp expansion and Mains Power Upgrade

Northlink 2 & 3 Highway extension – Underground services and Locating

Altura Mining – NPI Area Installation

FMG – Iron Bridge – Camp Expansion

FMG – Iron Bridge – “First Ore on Ship” (FOOS) project

Pilbara Minerals – Camp Fibre Upgrade, Warehouse and Laboratory works

Keiwi Ertech JV – AP Administration Area (Wheatstone) – Transportable construction and installation

Yulu – Iron Bridge – OPF Administration and Laboratory installation

Why we stand out from the rest

Innovation

We stay ahead of the curve by integrating cutting-edge technologies into our electrical solutions, ensuring efficiency and sustainability for our clients.

Quality Assurance

Our rigorous quality control processes guarantee the delivery of high-quality, reliable electrical systems.

Client-centric Approach

We prioritise client satisfaction, focusing on open communication, transparency, and delivering projects on time and within budget.

Our Specialties

- Electrical Works
- Communication Works
- Project Management
- Electrical Engineering and Consultancy
- Work, Health & Safety & Human Resources
- Working safely at heights
- Service Trenching
- Operation of Plant & Equipment
- Atco Gas High Pressure Gas Locating
- Service Locating
- Security Works
